

WEB3 PRE ✓

We want to help the world Web3

**We believe every human should have a verified
digital identity so they can travel easily/effectively
around the internet and Web3**

WEB3 PRE ✓

What problem are we solving?

Here in the US, TSA PRE ✓ enables us to verify one time and then travel easily/efficiently around the US regardless of which city we visit, airport we travel through or airline we fly

Why don't we have this option online?

What is our solution?

We want people to travel easily/efficiently around the internet and Web3 with soulbound NFTs to identify them and their traits to enable frictionless transactions so we've created Web3 Pre ✓

USE CASE

We started with creating a way to designate accredited investors so they can seamlessly move from investment to investment purely by showing their investor soulbound NFT upon making an investment

We propose

- User to submit documentation for Know Your Customer (KYC) one time for verification
- User to schedule a call with an investment advisor to do a financial health check
- A Web3 ticketing system to tokengate one on one Zoom calls with an investment advisor to do assessment and provide attestation of accredited investor status
- TODO: WEB3 Pre  as a soulbound NFT
- US entities taking investment to identify investors by the soulbound NFT and welcome them in
